ABOUT CARUSO DESIGNS

Beginning

All commenced from the age of 10 years sketching and drawing house plans from the local newspaper. Brought up within an Italian family with heritage from farming in the old county to building in Australia my early building experiences came from helping dad on building sites from cement mixing, concrete, to site labouring. This obviously evolved from material costing, ordering and early supervision.

Qualifications

Growing in the Building industry meant i would pursue further with not only interest in building construction, but developing a desire to design the exterior and interior of buildings.

[Qualifications - Diploma in Design & Drafting, Building construction.](#)

Today

Today, over 25 years within the building industry designing, constructing, and project management both in Australia and the UK, this has allowed myself to gain a vast amount of knowledge and experience. My travels and projects from urban city living, too country living and working abroad has allowed myself to learn and understand the diversities within different cultures, climates and lifestyle needs.

Understanding today's world

The world is changing having a huge impact on Australia and around the world in the way we live. With continuous environmental questions, population growth, immigration, space and increase living cost, People's lifestyle and needs are also changing dramatically, so must our building ideas.

["hence, our ideas, process and work ethics must allow change to create a lifestyle which meets our client's needs"](#)

Future ambition

Within the past 3 years living in beautiful Toodyay has given me a focus to work and provide a service to the country surrounds and people with the same possibilities has our city cousins.

I have understood the availability and/or distance makes it difficult for some to have there dream realized or achieved.

No project too large or too small, whether a new Home, Renovation, well deserved Kitchen or Bathroom please call us.
